

FUJITSU Image Scanner fi-7140

The essential fi Series scanner with exceptional business performance

shaping tomorrow with you

■ fi-7140 Features

■ Outstanding paper feeding delivers reliable batch scanning regardless of the document condition

The new scanners allow the user to scan a wide variety of paper thicknesses (27 to 413 g/m²), as well as plastic cards with the same feeding mechanism inherited from our high-end models. In addition, Paper Protection constantly checks along the whole document length during scanning and automatically stops paper feeding when error occurs to avoid any damage to the document. All in all these deliver the reliable scanning experience expected from Fujitsu.

● Reliable Skew Reducer even when scanning a mixed size batch

The fi-7140 automatically detect the document size when scanning a mixed size batch. Furthermore, it is equipped with Skew Reducer to detect the alignment of scanned documents and correct paper skews to minimize missing the edge of the scanned image. Users can rest assured that the result will be good even when scanning documents that are not aligned correctly.

■ Compact design for fast scanning right at your desk

The fi-7140 is a compact model that can be placed on the desk, whether for over-the-counter service or for operations in office. It scans at a speed of 40 ppm (A4, color, 200/300 dpi). Simply press the scan button and it will start scanning within a second. Scanning with the fi-7140 will not keep you, or your customers, waiting.

■ Automatically creates the most suitable high quality image data for OCR process

The PaperStream IP scanner driver, which supports TWAIN/ISIS, saves the inconvenience of fine adjusting the settings for the OCR process. It automatically converts the images into exceptionally clean images, accelerating OCR even when scanning wrinkled or soiled documents or documents with a background pattern.

■ Option: Post Imprinter

The optional imprinter unit prints identification markers like dates, alphanumeric codes and symbols on reverse side of the original document. This makes it easier to locate the originals of scanned document when you need to reference them.

■ Option: Carrier Sheets

Carrier Sheets allow you to scan documents, photos or clippings larger than A4 size. Documents larger than A4 (such as A3 or B4) or photos and clippings that can be damaged easily can be digitized when using the Carrier Sheets.

* Carrier Sheets (5 sheets per set) can be purchased separately. (The Carrier Sheet should be replaced approximately every 500 scans)

■ Options

Description	Parts number	Comments
Post Imprinter (fi-718PR)	PA03670-D201	Assists document management by printing numbers, Roman characters and codes on original documents after they have been scanned.
Carrier Sheet	PA03360-0013	Each package contains 5 carrier sheets. It is recommended that each carrier sheet be replaced after it has been used for 500 scans.
2D Barcode for PaperStream	PA43404-A433	This option enables the scanner to recognize 2D Barcode. (PDF417, QR code, Data Matrix, Aztec Code)

■ Consumables

Description	Parts number	Comments
Brake Roller	PA03670-0001	Lifetime: Every 200,000 sheets or one year. These rollers separate documents as they are being fed into the scanner.
Pick Roller	PA03670-0002	Lifetime: Every 200,000 sheets or one year. These rollers feed documents into the scanner.
Print Cartridge	CA00050-0262	Lifetime: 4,000,000 printed characters fi-718PR print head

Environmental compliance		ENERGY STAR® and RoHS
Included items		ADF paper chute, AC cable, AC adapter, USB cable, Setup DVD-ROM

*¹ The minimum scanning area only applies to using the ADF.

*² Capable of scanning documents that exceed Legal sheets in length. Long page scanning supports documents with a length of up to 5,588 mm (220 in.) when the resolution is set to 200 dpi or less.

*³ Capable of scanning up to 3 cards at a time. (Note: does not support multi-embossed card feedability.)

*⁴ Actual scanning speeds are affected by data transmission and software processing times.

*⁵ Indicated speeds are from using JPEG compression.

*⁶ Indicated speeds are from using TIFF CCITT Group 4 compression.

*⁷ Maximum capacity varies, depending upon paper weight.

*⁸ Selectable maximum density may vary depending on the length of scanned document.

*⁹ When scanning at high resolution (over 600 dpi), some limitations apply to the size of the document that could be scanned, depending on system environment.

*¹⁰ Excluding the ADF paper chute and Stacker.

*¹¹ The software can be downloaded from the website designated in the Setup DVD-ROM.
